

MENOPEARL®

1 TABLET ONLY 1x DAILY

HORMON-FREE

Give MENOPEARL® a bit of time: it takes a little while for the effect to set in. MENOPEARL® should be taken for at least two months to allow the beneficial effects to develop.

TIP: Be sure to drink enough water in order for the high-quality hyaluronic acid in MENOPEARL® to take full effect.

MENOPEARL® is free from animal components and lactose.

HAVE I ALREADY STARTED MENOPAUSE?

With this simple test you can find out whether you have already started menopause or if it is imminent

MENOPAUSE RATING SCALE (MRS) – Which of the following complaints do you currently experience? Please tick the intensity of each complaint. If a section does not apply to you, please select «none».

	NONE	MILD	MODE-RATE	SEVERE	VERY SEVERE
1 Hot flashes, perspiration (increase in heat, attacks of perspiration)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2 Heart symptoms (palpitations, racing heart, irregular heartbeat, tightness in the chest)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
3 Sleep disturbances (difficulty falling asleep, problems sleeping through, waking up too early)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
4 Depressive moods (despondency, sadness, tearfulness, lack of drive, mood swings)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
5 Irritability (nervousness, inner tension, aggressiveness)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
6 Anxiety (inner turmoil, panic)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
7 Physical and mental exhaustion (general deterioration in performance, impairment of memory, lapses in concentration, forgetfulness)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
8 Sexual problems (changes in sexual desire, sexual activity and satisfaction)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
9 Urinary problems (problems when urinating, more frequent urination, involuntary leakage of urine)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10 Vaginal dryness (dry or stinging feeling in the vagina, problems with sexual intercourse)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11 Joint and muscle symptoms (pain in joint regions, rheumatoid symptoms)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12 Increased hair loss (problems with thinning scalp hair)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
13 Age-related changes in skin appearance (affects moisture, radiant complexion, wrinkles)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

MENOPAUSE

Hormonal changes of menopause can strongly impair the quality of life for women

Menopause begins with the decrease in hormone production in the ovaries (medically: climacterium). The onset can vary a great deal from woman to woman.

Menstrual bleeding starts to change and eventually stops altogether:

- Stronger or weaker bleeding
- Longer or shorter duration of bleeding
- Spotting
- Shorter or longer cycles
